American Security Products Co. is highly acclaimed for offering the industry's best fire protection. We manufacture the industry's broadest gamut of fire-rated products ranging from Underwriters Laboratories (U.L.) Listed 1 and 2 hour fire safes to our Mercury 30, 45, 60, 90 and 120 minute fire protected gun safes.

Actual American Security Safe after a fire.

Fire Protection Level Chart

Each AMSEC safe is designed to maintain an interior temperature of less than 350°F. Paper products will char at approximately 450°F.

AMSEC gun safes that proudly display the UL Residential Security Container (RSC) Burglary Classification demonstrated the ability to withstand rigorous prying, drilling, punching, hammering, chiseling and tampering attacks performed by today's most experienced UL expert technicians.

All of our HS, BF, SF, FV and TF Series safes come with a Palusol Intumescent Door Seal. When the intumescent seal is exposed to high temperature (above 250°F), it expands to as much as 8 times its original thickness. This provides a strong positive seal between the door and body, preventing heat influx.

Since 1948 American Security Products has protected the assets of our clients throughout the world by providing a broad array of safes and consulting services with the highest degree of quality, integrity and responsiveness. Customers have trusted AMSEC safes for generations. The design of each AMSEC safe draws on over 65 years of experience on protecting the physical assets of our customers. There aren't many criminals with over 65 years of experience, so we think that gives us the advantage.

Before the American Security name is attached, each safe must undergo a rigid 28-point inspection. In addition, every AMSEC safe undergoes the industry's most comprehensive testing program. AMSEC uses independent agencies such as Underwriter's Laboratories to put our designs to the test. We maintain the tightest tolerances and highest standards of fit and finish in the industry.

Our commitment doesn't end there. We have built our company on the commitment to offer the best service in the industry which will insure that AMSEC remains the industry leader.

Our corporate center is staffed with highly trained Customer Service Representatives and our Service Department is supported by 7,500 factory-trained technicians throughout the world. We have been providing safes and security solutions to the banking industry since 1948. This type of high security technology is built right into our gun safes.

We produce over 60,000 safes each year and we take protecting our customers' assets very seriously. That's how we got to be the largest security safe manufacturer in the world, and that's why you can't buy a better gun safe than an American Security safe.
